## TELL US WHAT YOU LIKE ABOUT GRAPHENE WEEK 2024?

*The potential it has. If the people that attended the event start collaborating for real, it could transform the European industry even within the next 2-3 years. There were a few engagement and collaboration activities that were really good. The idea to reward the young generation was superb*

Anonymous

*Meeting new and old members of the community! Also the boat :)*

Anonymous

*“Great networking atmosphere, very interesting range of talks and posters, and open, collaborative spirit!”*

# DIVERSITY, POSITIVE IMPACT EVENT – FOR A SUSTAINABLE WORKING CULTURE

## Diversity in Graphene

Equity, Inclusion & Diversity (EID) is not just a catch phrase, having a diverse and inclusive work environment encourages creativity, collaboration and effectiveness. This session explored the importance of diversity in research institutions and the benefits and challenges associated with creating an inclusive environment. Speakers explored their experiences and was followed by an open discussion on challenges faced and mechanisms for creating inclusive environments.
